Turn machine on and Put boot disk into drive then hit enter – you will see booting disc
Once that is finished, take out boot disk and stick in a disk with a EXP design on it
(Melco Expanded) The screen will end up on Directory – you need to hit enter to read
the contents of the disk –

hit your up or down arrows to find design and hit enter – you will see the loading progress
- from there it is just as if you sent it through the software
